

A

A live *PTPRC* query separates the current view from database-wide evidence

ENSG00000081237

PTPRC Human All samples

All cell types ≥ 10 molecules

PTPRC · ENSG00000081237 · chr1:198,638,457-198,757,476 · 317 junctions

CURRENT VIEW

317 junctions · ≥ 10 molecules

DATABASE-WIDE

8,994 junctions · 2,341,560 molecules

CELL-TYPE DTU · SIG.

q = 0.00088 · effect = 0.338

APA · SIGNIFICANT

q = 0.00060 · effect = 0.204

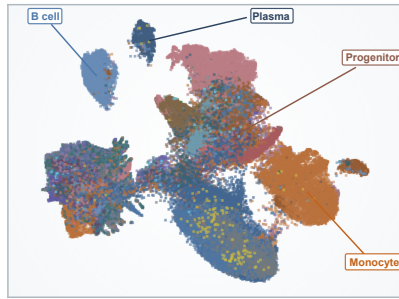

ASE · NOT SIGNIFICANT

q = 0.95 · effect = 0.194

B

Shared cell-type UMAP

Harmonized cell-type annotation

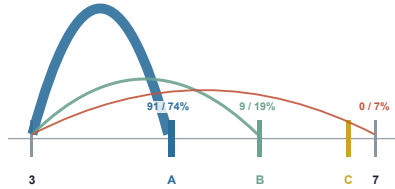

97,934 drawn cells · shared coordinates

Median-coordinate labels · no trajectory inference

C

B cell: exon-3 splice choice

21,182 + 21,963 informative reads

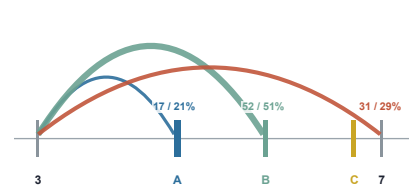

Arc width = share of reads; labels GSE307660 / GSE276974

D

Monocyte: exon-3 splice choice

86,661 + 5,149 informative reads

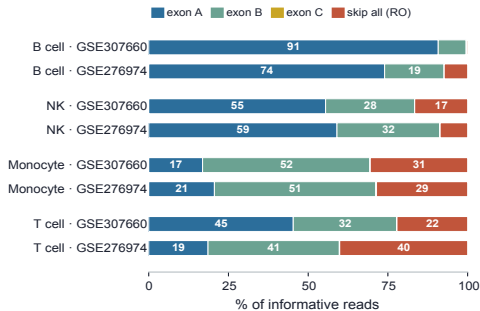

Arc width = share of reads; labels GSE307660 / GSE276974

E

Variable-exon usage across cell types and studies

CELL-TYPE DTU · q = 0.00088 · effect = 0.338 · 23 isoforms

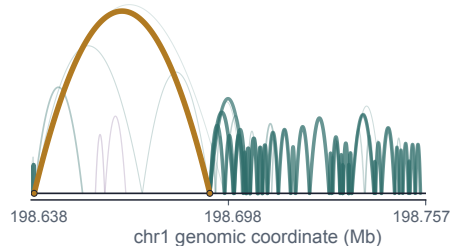

F

Junction evidence remains inspectable and exportable

LIVE TABLE · 100 rows shown / 317 filtered

+ strand − strand selected example width / opacity scale with log10(molecules)
