6 · API documentation

Captured 2026-08-05 from <https://scthread.ai4sc.ac.cn>. The home page (1) and the Download page (5) both lead with the frozen release — 453 run records, 34 datasets, 923,389 cells — which is the checksum-matched snapshot the manuscript reports. The rolling live catalog is labelled separately in the interface and is never mixed with it.

Live site: <https://scthread.ai4sc.ac.cn> · Demo gene: PTPRC · Every view is reachable without registration and every table shown is exportable.
